

Care & Maintenance Sheet 2

Duturo

1 Cleaning Surface Dirt and Grime

Add a small quantity of liquid detergent or soap to a bucket of warm water and clean the surface of the Duturo with a fine bristle scrubbing brush. After cleaning, rinse the surface with clean water.

Rinsing is best done using a garden mist sprayer (for small areas) or a low-pressure water hose (for larger areas). Where possible blot the wall dry with an absorbent towel or sponge.

Rinsing and drying the wall is an important part of the process, otherwise the solution of dirt and detergent will just dry back onto the wall.

For more stubborn or difficult marks such as lipstick, crayons or ink, denatured alcohol or white spirits can be effective however exposure time to these solvents should be kept to a minimum.

Never use any acid based bleaches or strongly coloured cleaning compounds. Duturo will be unaffected by mild detergents but may soften slightly with prolonged cleaning.

Duturo will return to its full hardness once it is fully dry. Aggressive cleaning can affect the surface of the product.

2 Damage and Repairs

Duturo is a tough and durable coating, but it can be damaged. In the event of damage please contact the installer or contact Armourcoat directly for technical assistance, instructions and patching material. To obtain repair material, you will need to quote the colour reference of the finish.

3 Changing the Colour of the Finish

If you wish to change the appearance or colour of the finish, Armourcoat offer a range of colourwashes that can be applied to the surface to change the colour and appearance of the surface. For more information please contact your local applicator or Armourcoat directly.

Armourcoat does not recommend painting Duturo, as this will have a negative effect on the surface finish and texture.
